Professional Experience

HSE Site Manager

Modern Construction Company – 10th of Ramadan City, Sharqia, Egypt | 2021 – Present

- Led the implementation of safety management programs, ensuring full compliance with Occupational Safety and Health Administration, National Examination Board in Occupational Safety and Health, and International Organization for Standardization 45001 standards.
- Conducted regular site inspections and risk assessments, identifying hazards and implementing preventive measures to reduce workplace incidents.
- Developed and delivered safety training programs, increasing employee compliance with safety protocols.
- Managed emergency response planning, including fire drills, first aid training, and evacuation procedures, improving response efficiency.
- Implemented a Permit to Work system, ensuring proper authorization and safety measures for high-risk activities such as lifting operations, confined space entry, and working at heights.
- Collaborated with project managers and site engineers to establish a zero-incident safety culture, enforcing personal protective equipment compliance and workplace ergonomics.

Professional Experience (continued)

HSE Site Manager

SODIC VILLETTE – Fifth Settlement, New Cairo, Egypt | 2021 – Present

- Developed and executed safety programs to enforce risk mitigation and regulatory compliance across large-scale construction projects.
- Monitored and audited job sites to ensure adherence to local and international safety regulations, maintaining full compliance.
- Investigated incidents, conducted root cause analysis, and enforced corrective actions, reducing repeat safety violations.
- Led safety meetings and toolbox talks, enhancing workforce awareness and strengthening safety culture.
- Supervised site safety officers, providing coaching and leadership to drive adherence to permit-to-work systems, hazard control measures, and environmental health and safety practices.

HSE Site Manager

KFURYLEEDS Construction Company – New Cairo City, Egypt

- Developed and enforced comprehensive site safety policies, aligning with Occupational Safety and Health Administration 1926 and 1910 standards.
- Implemented a risk-based safety strategy, minimizing incidents related to lifting operations, scaffold work, and confined spaces.
- Led accident investigations, compiling reports and recommending preventive actions to improve workplace safety.
- Managed permit-to-work approvals, ensuring a controlled work environment for critical activities such as cutting, welding, and heavy lifting.
- Conducted training workshops on fire prevention, first aid, and emergency evacuation procedures, enhancing emergency preparedness.

HSE Site Supervisor (HSE Officer)

SODIC EAST (TOWN HALL Building Project) – El Shorouk City, New Cairo, Egypt

- Conducted regular health, safety, and environment inspections and audits, identifying compliance gaps and implementing corrective actions to meet industry standards.
- Maintained and updated health, safety, and environment action plans, ensuring real-time communication of safety concerns with management and site teams.
- Organized and delivered workplace safety training, covering hazard identification, personal protective equipment compliance, and emergency response procedures.
- Developed safety risk assessments and reports, guiding leadership in decision-making to improve workplace conditions.
- Supervised site safety measures during lifting operations, working at heights, and confined space activities, preventing potential hazards before they occurred.

HSE Officer

Future Builders Construction Company – New Cairo City, Egypt

- Conducted safety inspections, risk assessments, and compliance audits to ensure adherence to health and safety regulations.
- Implemented and monitored safety training programs for employees, improving workforce safety awareness.
- Led incident investigations, performed root cause analysis, and developed corrective action plans, significantly reducing workplace injuries.
- Supervised lifting, welding, and high-risk activities, ensuring proper permit-to-work approvals and compliance with best safety practices.
- Organized emergency response drills, including fire prevention, first aid, and evacuation simulations, enhancing team preparedness and reaction times.
